## **CLAIMS**

1. A valve assembly comprising:

a replacement valve; and

a collapsible and expandable anchoring structure;

said anchoring structure being dimensioned to extend longitudinally from an attachment location near the inflow annulus of a valve sinus to an attachment location within a sinus cavity; and

said anchoring structure further comprising a flared inflow rim, a flared outflow rim, and a plurality of vertical elements extending from the inflow rim to the outflow rim.

- 2. The valve assembly of claim 1, wherein said valve is positioned internally to said anchoring structure.
- 3. The valve assembly of claim 2, wherein said valve comprises an inflow annulus, an outflow annulus and a plurality of leaflets.
  - 4. The valve assembly of claim 3, wherein said inflow annulus is scalloped.
- 5. The valve assembly of claim 1, wherein said flared inflow rim comprises one or more rings configured in an undulating pattern.
- 6. The valve assembly of claim 1, wherein said flared outflow rim comprises diamond and hexagon shaped structures.
- 7. The valve assembly of claim 1, wherein said vertical elements are configured to coincide longitudinally with the sinus commissural posts.
